HT-E6530

Samsung's proprietary hybrid home entertainment system combines both vacuum tubes and a digital amplifier into one compact unit to create a first of its kind home entertainment system. The HT-E6530 combines powerful digital amplification of 1000 watts with the warmth and fullness only a tube amplifier can deliver. Watching 3D movies in 5.1 channel surround sound is just the beginning. The built-in Smart Blu-ray player, packed with an intuitive Web Browser, will give you access to endless online content for a truly unique experience, only from Samsung.

The Best of the Old with the Best of the New

Vacuum Tube Amplifier

Music fans would argue that records (LP's) produced a "warmth" that no digital format can ever reproduce. This is the reason Samsung has developed the industry's first hybrid entertainment system. Warm up your digital MP3s to sound like your old records, minus the skips and scratches.

Smart Blu-ray Player Built-in

Make every *TV in your home SMART with Samsung's SMART Blu-ray player built-in. Wirelessly connect to endless offerings of movies, TV shows, music, sports, and information through Internet-based services all through our user-friendly Smart Hub interface.

*Television must have available HDMI input.

Auto Sound Calibration

With Samsung's auto-calibration system, optimizing sound in your space has never been easier. Just plug in the supplied microphone and place it in your preferred seat and let the HT-E6530 do the rest. The microphone sends information back to the main unit and the system will automatically be calibrated for the best possible experience.

Vacuum Tube Built-in

Samsung SMART Blu-ray® Player

Auto Sound Calibration
